## University of South Florida Final iPASS Grant Report

1. Please restate your current iPASS grant vision. Describe activities and accomplishments to date, including where the work stands now in relation to your vision.

The University of South Floridavision for iPASS is to bring all student support personnel into a coordinated network of providers that will contribute more timely and targeted support to at risk undergraduate students to accelerate USF's path to state Preeminence and AAU eligibility. The original manifestation of that vision shifted paths early in the project from a narrowly tailored focus on academic tracking (e.g., ATLAS) to comprehensive holistic reform of student support services at multiple levels across the university significantly this represents a transition from focus on reactive strategies applied to large student population focus on effectively identify individual student needs in the moment of Recolous activities and accomplishments connected to our iPASS work includes:

- A comprehensive orsite institutional advising program evaluation performed by consultants from the National Academic Advising Association (NACADA)at produced a gap analysis to engage stakeholders, catalyze the change process and prioritize areas of higheed within the advising community.
- The establishment of an ongoing process for the development of an institutional Academic Advising Strategic Plan
  - During 2015the original strategic planning process, guided by the then Vice Provost for Student Success, focused on the alignment of academic advising priorities with the USF 202018 Strategic Plan.
  - In 2018, the Advising Assessment subcommittee of the University is in Academic Advising (CAA) attended NACADA's Assessment Institute to review and update the existing vision, mission and values to further connect with the case management mode f student support developed in the iPASS project.
- Three and a hall phases of collaborative product design and development on the Archivm Insights Student Success dashboard. Product features include:

Case management workflow for the Academic Achtes (e.g., institutionledvel case managers for undergraduate student success) to coolinforate at one and support for students at high risk for attrition;

A studentfacing portal for accessing and contacting the assigned Care Team; Centralized creation and storage of private and dudentfacing notes;

Preliminary utilization reporting to evaluate engagement with case management model across multiple offices as well as by individual SSP

A graduation dashboard (e.g., Finish in Four) to record and transferrial data

The final outcome centers on improving communication between student support offices by demonstrating increased diversity in the different offittesting and receiving referrals. More specifically, the principles of case management strategy are rooted in how effectively students are connected to the right officemultiple offices should be involved in both sending and receiving referralsData shows that on averageademic advisors and advocates account for over 75% of referral activityble 1 and 2 however, there are signs of improvement.

In 20172018, 10% of referrals sent originated from peer advisors (e.g. Office of New Student Connections), Residential Life, Financial Aid and Career Serviceone of which had any referral activity during the 2021/0617 academic year. There is also an indication of reduced activity by the Academic Success Center, Academic Foundations instructoreachic Success in Athletics; this trend needs to be explored in more detail. The most promising trend appears in Table 2 which details

student success as well as a more granular look at how case managementhenphadent experiencein lieu of using the larger institutional metrics.

4. What does the student experience of advising and planning look like now after your iPASS work? What are the biggest changes from three years ago?

The most substantive change in the student experience establish a campus culture that creates an environment where students, regardless of differences in backgrounds, experiences and resources lieve the USF community as a whole is committees tudent welfare. This is exemplified by more personalized communication and a heightened sense of awareness and empathy amongst staff about what students' experience the employee delivers front ine customer service or is the chief academic of the USF System. For example, the Office of New Student Connections and Residential Education have utilized the case management structure to integrate more conversations with students to create intentional opportunities to connect the support. This awareness allows staff to truly see the needs of the community they serve in order to respond effectively and expectionally engagement also results in an evolved student experience where needs are anticipated instead of relying on the student to independently seek assistance.

5. Have any major factors or conditions, such as staffing or funding, changed over the grant period? How have these changes affected the work?

During the entire grant period, there have been a number of reorganizations including the

of Archivm, advising and other student services offices utilized multiple student success technologies but few to none have been integrated into a single system or access point. Creating a unified model of student support requires more than technology, and
